Frontend Developer | Software Engineer | Web Developer

Frontend Software Engineer with 5 years of full-stack expertise delivering effective and enjoyable user interfaces on multiple platforms. Focused on a strong connection between the product and user, facilitating engagement and project success through modern tech solutions.

EXPERIENCE

Software Engineer

May 2017 - Sep 2022

Faithlife Corporation | Bellingham, WA

- **Led Faithlife TV's enhancement** using React, Redux, and TypeScript, introduced a cross-platform "watchlist" feature, improving UX for **30k+ monthly users across web, iOS, Android, Apple TV, Fire TV, and Roku**, demonstrating adeptness in multi-platform programming.
- **Solely developed Faithlife TV's Roku client** using Brightscript and XML SceneGraph, showcasing swift adaptation to an uncommon language. Designed custom components such as the video player UI while leveraging built-in components where possible.
- **Upgraded Faithlife's digital asset manager** using AngularJS and TypeScript, implementing an upload manager and enhanced file management features. Improving the front-end for nearly **6 million users**.
- **Assisted in creating Faithlife.com's church management system** using React and C#, built to help over **50k churches manage members of their congregation**. Created a touch-friendly child check-in system.
- **Developed an interactive timeline web component for Logos Bible software** with React, seamlessly synchronizing **18k+ events across web, desktop, and iPad platforms**.
