Frontend Developer | Software Engineer | Web Developer

5+ years of full-stack expertise, delivering effective and enjoyable interfaces to **over 6 million users** across multiple platforms. Seeking a team committed to equipping customers with stable, user-centric information through well-suited software.

EXPERIENCE

Software Engineer   **2017 - 2022**

Faithlife Corporation | Bellingham, WA

Faithlife TV

- Boosted reliability across **6 platforms (web, iOS, Android, Apple TV, Fire TV, Roku)** with thorough testing and bug resolution
- Single-handedly built a Roku video stream client serving over **30k+ monthly users**, showcasing adaptation to an uncommon language through the use of Brightscript and XML SceneGraph
- Launched a **'watchlist' and 5-star rating system** feature across all platforms using a RESTful API
- Re-engineered **80% of Faithlife TV's web application** using TypeScript, replacing React and Redux class components with functional components and hooks

Internal digital asset manager

- Enhanced productivity for over **500 co-workers** by adding new file management capabilities and boosting file transfer performance using AngularJS and TypeScript
- Devised an **upload menu** for hundreds of simultaneous file uploads, increasing user efficiency

Faithlife.com

- Contributed to the development of Faithlife.com's church management system, aiding over **50k churches** with congregation management using React and C#
- Collaborated with the Design team to craft a touch-friendly **child check-in system** featuring an external label printer, facilitating swift and effortless child tracking for church attendees and educators
- Created a tool **transforming church members' data** into structured, visually-pleasing **printable lists**

Logos Bible Software

- Developed an interactive timeline web component for Logos Bible software with React Virtualized, synchronizing **18k+ events** across web, desktop, and iPad platforms using interops
- **Mentored 3 junior developers** in TypeScript, React, and CSS, promoting team growth

EDUCATION

Full-stack Web Development Program | Devmountain Provo, UT

Associates in Arts & Computer Science Studies | Mesa Community College, AZ
